11. Center of Excellence's

1. AR VR Laboratory

The Center of Excellence: AR VR Laboratory is essential for advancing AR and VR technologies, bridging the gap between academia and industry, and preparing a skilled workforce for the future. It fosters innovation, enhances educational experiences, and supports regional and global competitiveness in the rapidly evolving tech landscape.

Vision & Mission:

Vision:

To establish leading centre of innovation and excellence in Augmented Reality (AR) and Virtual Reality (VR), transforming the future through cutting-edge research, immersive technology education, and industry collaboration for shaping a new generation of engineers equipped with visionary insights.

Mission:

To educate and empower the next generation of AR/VR professionals by providing state-of-the-art facilities, expert guidance, and immersive learning experiences through innovative training programs to drive innovation in AR and VR technologies through pioneering research and development.

Learning Outcomes:

- ➢ LO 1: Gain a thorough understanding of the principles and technologies underlying augmented reality and virtual reality.
- ➢ LO 2: Develop proficiency in using AR/VR development tools, software, and hardware.
- ➢ LO 3: Acquire advanced programming skills for creating AR/VR applications, including knowledge of relevant languages and frameworks.
- ➢ LO 4: Enhance creative thinking and problem-solving skills by tackling real-world challenges using AR/VR technologies.
- ➢ LO 5: Develop an innovation mindset, encouraging experimentation and iterative improvement in AR/VR projects

About:

The Center of Excellence: AR VR Laboratory is a cutting-edge facility dedicated to the exploration, development, and application of Augmented Reality (AR) and Virtual Reality (VR) technologies. Established with the vision of becoming a leading hub for innovation and research, our laboratory is equipped with state-of-the-art tools and resources to drive advancements in these rapidly evolving fields.

At the Center of Excellence, we are committed to fostering a collaborative environment where researchers, students, and industry professionals can work together to push the boundaries of

AR and VR. Our laboratory supports a wide range of projects, from experimental research and prototyping to the development of immersive applications for education, healthcare, entertainment, and more.

Key areas of focus include:

- **Innovative Research:** Conducting groundbreaking studies to uncover new possibilities and applications for AR and VR technologies.
- **Industry Collaboration:** Partnering with leading companies and organizations to bridge the gap between academic research and real-world implementation.
- **Education and Training**: Offering hands-on training programs and workshops to empower the next generation of AR and VR experts.
- **Prototype Development:** Providing the resources and expertise to bring innovative ideas from concept to reality.

Introduction to AR-VR:

Augmented Reality (AR) and Virtual Reality (VR) are transformative technologies that merge the physical and digital worlds to create immersive experiences. AR overlays digital content onto the real world, enhancing our perception of reality with interactive elements. VR, on the other hand, creates entirely simulated environments, allowing users to interact within a fully digital space. Together, AR and VR are revolutionizing how we interact with technology, offering new possibilities in fields ranging from entertainment to education and beyond.

Importance of AR VR:

AR and VR are not just emerging technologies—they are catalysts for innovation across various industries. In healthcare, they enable advanced surgical simulations and patient care; in education, they create immersive learning experiences; in engineering and design, they offer unparalleled tools for visualization and prototyping. The importance of AR and VR lies in their ability to create more engaging, efficient, and effective experiences, breaking down barriers between the physical and digital worlds.

Benefits of AR VR:

- The Center of Excellence: AR VR Laboratory is uniquely positioned to harness the full potential of AR and VR technologies. Our facility offers numerous benefits, including:
- Advanced Research Opportunities: Our lab is equipped with the latest AR and VR technologies, providing researchers with the tools needed to conduct pioneering studies and develop new applications.
- Industry Partnerships: We collaborate with leading companies to drive innovation and ensure that our research has real-world impact.

- Hands-on Experience: Students and professionals alike have the opportunity to engage with cutting-edge technologies, gaining practical skills that are in high demand.
- Prototype Development: Our lab supports the creation and testing of new AR and VR applications, helping turn innovative ideas into functional prototypes.

Usefulness for Students:

The Center of Excellence: AR VR Laboratory is a valuable resource for students, offering them unique opportunities to:

- Learn by Doing: Students can engage in hands-on projects that allow them to apply theoretical knowledge to real-world scenarios.
- Develop In-demand Skills: With AR and VR rapidly growing in importance, students can gain expertise in these technologies, giving them a competitive edge in the job market.
- Collaborate on Innovative Projects: The laboratory encourages collaboration between students, researchers, and industry professionals, fostering an environment of creativity and innovation.
- Explore Career Opportunities: By working with cutting-edge technology and industry partners, students can explore various career paths and build a strong professional network.

2. Blockchain Technology Center of Excellence

VISION

A collaborative ecosystem between academia and industry accelerates Blockchain adoption by combining research with real-world applications. Academia offers fresh insights and talent, while industry provides practical challenges and resources. This partnership nurtures innovation, keeps education relevant, and drives the evolution of blockchain solutions.

MISSION

Empowering individuals with essential Blockchain skills through immersive methods like case studies, projects, and internships ensures they're ready for industry demands. This hands-on approach builds real-world expertise and adaptability, preparing them to innovate in the evolving blockchain landscape.

The learning outcomes are

LO1	Understand the fundamental concepts of Blockchain Technology, including its underlying principles and mechanisms.
LO2	Understand the fundamental concepts of Blockchain Technology, including its underlying principles and mechanisms.
LO3	Develop and execute small-scale projects or case studies in Blockchain Technology, showcasing the ability to apply theoretical knowledge to solve practical problems effectively.
LO4	Utilize available Blockchain software tools and platforms proficiently, enabling successful implementation and understanding of Blockchain solutions.
LO5	Complete an internship or practical experience in Blockchain Technology, gaining hands-on experience and practical insights into the industry, and preparing for future career opportunities.

A Pioneering New Program for GHRIET Students

In partnership with the India's leading Snapper Future Tech Pvt. Ltd. Blockchain Centre of Excellence @ GHRIET will provide students training on Blockchain Technology. Upon successful completion of the Training, students become innovators, contributing to the growing demand for blockchain solutions in the global tech landscape also student will receive the "Certified Ethereum Developer" Certificate.

What is Blockchain?

Blockchain **is** a decentralized, secure, and transparent digital ledger that records transactions in tamper-proof blocks linked in a chain. It enables trust, immutability, and efficiency, powering applications like cryptocurrencies, supply chains, and more.

About Snapper Future Tech Pvt. Ltd

Snapper Future Tech (SFT) is an enterprise Blockchain company pioneering Blockchain since 2017. Snapper Future Tech is a global products and services company, leading digital transformation for enterprises using blockchain. It offers services in Blockchain application development, training & consulting and an innovative suite of specialised products for e-Governance, Financial Services, Insurance, and Sustainable Supply Chain & Healthcare. SFT has developed products based on blockchain and served customers across multiple geographies and industries. SFT participates in open-source initiatives across the globe & has robust technological alliances & partnerships.

About Blockchain Technology Centre of Excellence:

A Blockchain Centre of Excellence (BCoE) is focused on advancing blockchain technology through research, innovation, and collaboration. It aims to explore blockchain's potential, develop use cases, and provide training to bridge the gap between technology and industry needs. The students will also learn how:

- Identify and propose blockchain solutions for industries like finance, healthcare, supply chain, and more.

- Gain proficiency in tools like Solidity, Truffle, and other blockchain development frameworks. To use recorders to capture actions.

- Set up, configure, and maintain blockchain environments and nodes.

- Resolve technical challenges in blockchain implementation and development.

- Design and prototype new blockchain-based solutions for real-world problems.

- Stay informed about advancements in blockchain technology and regulatory requirements.

3. Center of Excellence in BOT Training: RPA Lab

VISION

To design the software bots to automate several tasks in specific order to meet the demanding needs of multi-disciplinary industry.

MISSION

To enhance the problem-solving skills, critical thinking and design thinking skills for creating bots to serve in socio-economic perspectives.

The learning outcomes are

CO1	Understanding the automation potential and realizing the value in RPA.
CO2	Demonstrate good understanding RPA Platform Architecture and Components.
CO3	Demonstrate good understanding of Recorders, Editor, and various essential Commands to build simple tasks / Bots for automating simple processes.
CO4	Automating Tasks through office automation packages.
CO5	Independently develop solution for automating the tasks.

A Pioneering New Program for GHRIET Students

In partnership with the world's leading RPA solution provider, Automation Anywhere, Bot Lab @ GHRIET will provide students training in Automation Anywhere's Automation 360 platform. Upon successful completion of the RPA-specific portion of the course, students will receive an Automation Anywhere A360 Essential RPA Professional badge.

What is Robotic Process Automation?

Robotic Process Automation is a simple and powerful software solution that uses no-code/low-code tools to create digital "robots" to automate any business process. RPA bots are configurable pieces of software set up to perform tasks assigned and controlled by end users. These bots can interact with any system or application in the same way a user does. Furthermore, this process is code-free, non-disruptive, non-invasive, and easy.

Automation Anywhere A360 is the leading intelligent automation platform used by the world's top enterprises. It is the world's only cloud-native, web-based platform for end-to-end automation.

About Automation Anywhere

Automation Anywhere is a global leader in Robotic Process Automation (RPA), empowering customers to automate end-to-end business processes with intelligent software bots – AI-powered digital workers perform repetitive and manual tasks, resulting in dramatic productivity gains, optimized customer experience and increased employee engagement. The company offers the world's only cloud-native and web-based automation platform combining RPA, artificial intelligence, and machine learning and analytics. Compared to legacy monolithic platforms, this combination of features significantly reduces total cost of ownership (TCO), increases security, and accelerates scalability. Automation Anywhere's Bot Store is the world's first and largest marketplace with more than 1,200 pre-built, intelligent automation solutions. Automation Anywhere has deployed over 2.9 million bots to support some of the world's largest enterprises across all industries in more than 90 countries.

About the RPA Lab:

Through this collaboration with automation anywhere university students are able to access the "Bot Lab" – a center of excellence that provides students – access to Automation 360 an RPA-as-a-service platform. This is the world's only Cloud Native, Web based platform for end-to-end automation. This initiative helps students understand the RPA while working on building basic bots independently.

The students will also learn how:

- Business processes are identified and evaluated for automation

- Building bots can help solve time consuming and repetitive business processes and automate them.

- To use recorders to capture actions.

- To use the various action packages available within Automation 360 to automate and solve complex, repetitive, time-consuming business processes.

- Students will also learn how to reuse bots for scalability and build resiliency within them.

- Learning will be reinforced through concepts and walk-through demos.

- Every faculty member will be given apt training to be able to understand each aspect of RPA.

The company's Bot Store is the world's primary and largest marketplace with over 1,200 pre-built intelligent automation solutions. Automation Anywhere has also created close to 3 million bots to support the world's largest enterprises across all industries in over 90 countries. Through Automation Anywhere students can get brilliant placements as a preferred choice that takes them to the next level in the field.

4. Center of Excellence in Solar Technology: Solar Lab

Solar Lab at G. H. Raisoni Institute of Engineering & Technology Nagpur was established for the academic session 2019-20 in association with electrical engineering Department. Establishing a solar lab in an engineering college can be of significant importance for several reasons, contributing to both the educational and practical aspects of engineering.

The primary objective behind the establishment of solar lab is not only for the requirement of academic essentials but also for the improvement of skill students. The solar lab provides students with hands-on experience in designing, installing, and maintaining solar energy systems. This practical exposure enhances their understanding of theoretical concepts and fosters a more holistic learning experience. The operation and maintenance of solar energy systems require specific skills. A solar lab provides students with the opportunity to develop practical skills related to solar panel installation, energy storage, and system troubleshooting, which are valuable in the job market. Integration of solar labs into the curriculum ensures that students are exposed to the latest technologies and industry trends. This keeps the educational programs relevant and aligned with the needs of the evolving energy sector.

Moreover, the solar lab serves as a hub for research and innovation in the field of solar energy. Faculty and students can conduct experiments, explore new technologies, and contribute to advancements in solar power generation and storage. Also, solar labs can facilitate collaboration between academia and industry. Partnerships with solar energy companies, government agencies, and research institutions can lead to joint projects, internships, and opportunities for students to gain real-world experience.

The primary details of solar lab is given below:

Lab-In charge: Prof. Sachin Anil Karare

Area of Lab: 80.22 Sq. meters

Total Investment: Rs. 171,566.8

Lab Utilization: 12 Hours per week

Utilized for Program: B-Tech

Glimpses of Solar Lab

MoU with Companies: In this academic session we have MOU with two companies. The details are as follows:

"Voting Awareness Campaign"

As a Citizen, Voting is one of the most important rights. It is our opportunity to have a say in who represents us in government, and it is a way to hold our elected officials accountable. With this Motive, NSS unit of GHRIETN organizing Voting card Campaign for the not-enrolled voters in the campus. During the Campaign, Staff/students were aware about voting importance. In addition to being a fundamental right, aware about how voting is also important for the health of our democracy. When people do not vote, they are effectively silencing themselves and ceding power to those who do vote. This can lead to bad decisions being made that impact everyone, even those who did not bother to vote. Dr. Vivek Kapur, Director, GHRIET congratulate all the participant and faculty coordinator for successful organisation of event.
