Examination Process Awareness Session organized for FY students in

Prarambh 25

A session on the examination process was conducted by Dr. Tushar Shende as part of the induction program for first-year B.Tech students at Eklavya Hall. The session witnessed the active participation of around 227 students, making it an informative and engaging event.

Dr. Shende provided a comprehensive overview of the academic evaluation system followed in the institution. He began by explaining the components of assessment, namely Continuous Assessment Evaluation (CAE), Teacher Assessment Evaluation (TAE), and End Semester Examination (ESE). He emphasized that CAE includes regular class tests, quizzes, assignments, and attendance, which contribute significantly to the final score. TAE, on the other hand, focuses on the teacher's evaluation of a student's performance, participation, and overall engagement throughout the course. Further, he elaborated on the structure and importance of the End Semester Examination (ESE), highlighting its role in assessing the conceptual understanding of students at the end of each semester. Dr. Shende also explained the grading system in detail, including how grades are assigned based on performance in all evaluation components.

A key part of the session was the explanation of CGPA (Cumulative Grade Point Average) and its calculation. He clarified how CGPA reflects overall academic performance and how it can be converted into percentage using the prescribed formula.

The session concluded with an interactive Q&A, where students clarified their doubts. Overall, the session was highly beneficial in helping students understand the examination process clearly.
